

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

High Temperature Processes

Lecture No.				
Discussion Sessions	Title		Speaker	Page
Current status of cokemaking technologies and challenges for the future				
9:25 ~ 9:55				
D1	Investigation of the briquette and ferrocoke quality produced by blending the low rank coal		H. Fujimoto	1
9:55 ~ 10:25				
D2	Pretreatment or controlling pyrolysis reactions of coals for producing metallurgical coke utilizing low-grade coals		R. Ashida	3
10:25 ~ 10:55				
D3	Effect of non-or-slightly caking coal addition on factor of coke strength and coke structure		S. Aizawa	5
11:10 ~ 11:40				
D4	Evaluation of hpc effect for thermoplasticity of caking coal by NMR		K. Sakai	7
12:50 ~ 13:20				
D5	New coke-making technology from non-caking coals		T. Takanohashi	9
13:20 ~ 13:50				
D6	Preparation of cokes from lignite/biomass: modification of strength and reactivity		J. Hayashi	11
14:00 ~ 14:30				
D7	An application of the numerical simulation for new cokemaking technology development		H. Aoki	13
14:30 ~ 15:00				
D8	Evaluation of affector of sulfur distribution in coke manufacturing		A. Daisuke	15

Instrumentation, Control and System Engineering

Lecture No.				
Discussion Sessions	Title		Speaker	Page
Wireless sensor network application for steel manufacturing process				
9:00 ~ 9:30				
D9	Improvement of wireless sensor network for corrosion and fatigue monitoring and its application to equipment diagnosis		M. Enoki	17
9:30 ~ 10:00				
D10	Radio propagation model and sensor localization in blast furnace		T. Ohtsuki	21
10:00 ~ 10:30				
D11	Catalytic combustion-type carbon monoxide gas sensor with oxidation catalyst based on rare earth oxides		N. Imanaka	25
10:40 ~ 11:10				
D12	(ISIJ Research Promotion Grant) Development of vibration-driven high power generator using piezoelectric thin films		H. Kuwano	29
11:10 ~ 11:40				
D13	Oxide thermoelectric modules for power generation from unused decentralized thermal energy		M. Ohtaki	33

Processing for Quality Products

Lecture No.				
Discussion Sessions	Title		Speaker	Page
Recent topics on the forming and manufacturing high tensile strength steels				
13:30 ~ 14:00				
D14	Forming limit analyses of high strength steel sheet using differential hardening model		T. Hakoyama	35
14:00 ~ 14:30				
D15	Tasks and solutions for shearing process of high-strength steels		T. Matsuno	39
14:30 ~ 15:00				
D16	Improvement on CAE model for accurate springback prediction in consideration of tool deformation in high strength steel part forming		A. Ishiwatari	43
15:20 ~ 15:50				
D17	Effect of forming and interface conditions on formability of hot stamping process		A. Yanagida	47
15:50 ~ 16:20				
D18	High accurate roll forming technology for high tensile steel sheet		F. Fujita	49
16:20 ~ 16:50				
D19	Manufacture and formability of steel strip sheets with bimodal structure by heavy-reduction controlled rolling		H. Park	53

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

Process Evaluation and Material Characterization

Lecture No.	Title	Speaker	Page
Characterization of elements and properties heterogeneously distributed in materials			
9:00 ~ 9:25			
D20	Development of surface modification technique using an oxygen glow-discharge plasma for improving the biocompatibility of Ti-6Al-4V alloy	K. Satoh	55
9:25 ~ 9:50			
D21	Rapid distribution analysis of inclusion particles by using laser-induced plasma spectrometry	S. Nakahata	59
9:50 ~ 10:15			
D22	(ISIJ Research Promotion Grant) Characterization of magnetic property and structure of Fe-Ni alloy nanoparticles synthesized by reduction annealing of hydroxyde particles	S. Fujieda	61
10:15 ~ 10:40			
D23	Dislocation partitioning in ferrite and austenite phases of duplex stainless steel	S. Sato	63
10:50 ~ 11:15			
D24	Residual stress measurement of cold-drawn pearlite steel using white X-rays	M. Kumagai	66
11:15 ~ 11:40			
D25	Effect of elastic anisotropy on microscopic stress in Fe-Ga polycrystalline alloys	R. Ukai	69
11:40 ~ 12:05			
D26	(ISIJ Research Promotion Grant) Application of two dimensional detectors for X-ray stress/strain analyses of ultimately textured materials	M. Imafuku	71

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

High Temperature Processes

Lecture No.	Title	Speaker	Page
Plenary Session			
Young engineer session of coke-making 1			
1	Measurement of the size distribution of inertinite in coal by image analysis	T. Ogata	75
2	Influence of briquette blend to filling structure of powder part	M. Watanabe	76
3	Effect of inner defects on contraction behavior of coke	N. Nanri	77
Young engineer session of coke-making 2			
4	Coke strength improvement by the coal crush	Y. Oyagi	78
5	Effects of coal moisture on quasi-particle formation and coke strength	Y. Dohi	79
6	Evaluation of corrosion condition inside surface of COG supply piping	Y. Nagashima	80
7	Diagnostic technology for preventive maintenance of coke oven	R. Takamatsu	81
Thermodynamics 1			
8	Effect of oxygen partial pressure on the activity of FeO in the FeOx-CaO-SiO ₂	Y. Katahira	82
9	(ISIJ Research Promotion Grant) Thermodynamic measurement of CaO-SiO ₂ -P ₂ O ₅ system by mass spectrometry	T. Nagai	83
10	Reaction between CaO-Al ₂ O ₃ binary oxides and H ₂ +H ₂ O+HCl gas mixtures	M. Hasegawa	84
Thermodynamics 2			
11	Thermodynamics of sulfur in Fe-V-Ni-Mo alloy melts and CaO-Al ₂ O ₃ -SiO ₂ slag	D. Kim	85
12	Effect of alloying elements on N solubility in high Al-Mn alloyed steels	J. Jang	86
13	Equilibrium relationships between oxide and alloy phases in Fe-Co-Ni-O system at 1673K	X. Lu	87
Young engineer session of ironmaking			
14	Development of cohesive zone simulator for evaluating effect of coke slit layer thickness on permeability 1	K. Ichikawa	88
15	Development of cohesive zone simulator for evaluating effect of coke slit layer thickness on permeability 2	K. Ichikawa	89
16	Fundamental investigation of coke segregation behavior on high-ratio coke mixed operation by DEM	K. Terui	90
17	Operation using quantity of stockpiled coke at Kashima No. 1 and No. 3 Blast furnace	M. Sugawara	91
18	Countermeasures to growing scab at Kobe No.3 Blast Furnace	K. Tanaka	92
Reduction of iron ore			
19	Reduction behavior of Fe _x O-graphite composite at elevated temperature	T. Murakami	93
20	In-situ observation of reduction of calcium ferrites by using XRD	R. Murao	94
21	Influence of addition of hydrogen on reduction behavior of sinter ore using high temperature X-ray diffraction	C. Boyuan	95
Softening and melting			
22	The role of alumina in the relationship between carbon dissolution and wettability of molten iron on carbonaceous materials substrate	C. Nguyen	96
23	Effect of Al ₂ O ₃ content on the microstructure change and slag melting of sinter in cohesive zone of blast furnace	Y. Maeda	97
24	Observation of softening, melting and penetration behavior of iron ore on a coke bed	S. Ueda	98
Phenomena of lower part of blast furnace			
25	Evaluation of bird nest gas permeability by slag drop experiment (improvement of gas permeability at lower part of blast furnace by LD-slag injection-1)	T. Kato	99
26	Developed technology of flux injection at Kobe No.3 Blast Furnace (improvement of gas permeability at lower part of blast furnace by LD-slag injection-2)	N. Mitsuoka	100
27	ADEM simulation of particle breakage behavior	S. Ishihara	101
28	Effect of packed bed compression on gas flow behavior in the bed	T. Kon	102
The evolution in the research of high temperature physicochemical property 1			
29	Wettability of platinum substrate to molten Li ₂ Si ₂ O ₅ and its effect on crystallization	M. Tashiro	103
30	Wettability and interfacial reaction of carbon containing refractory substrates to CaO-SiO ₂ -CaF ₂	K. Yasutake	104
31	Penetration behavior and interfacial reaction of calcium ferrite melts into iron oxide substrate	R. Furuta	105

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

32 Measurement of contact angle between solid FeO and liquid Cu-Fe alloy	D. Kato	• • •	106
The evolution in the research of high temperature physicochemical property 2			
33 Structural analysis of network former oxide melts by high-temperature Raman spectroscopy	N. Umesaki	• • •	107
34 Relationship between local structure around b and Si and thermal conductivity in the molten Na ₂ O-B ₂ O ₃ -SiO ₂ system	Y. Kim	• • •	108
35 Thermal conductivity of CaO-SiO ₂ -M ₂ O(M=Li,Na,K) silicate melts	H. Ohta	• • •	109
The evolution in the research of high temperature physicochemical property 3			
36 (ISIJ Research Promotion Grant) Effect of Ca-Mg substitution on viscosity of aluminosilicate melts	K. Kim	• • •	110
37 Improvement of the measurement accuracy in low viscosity region by cylinder rotating method and viscosity measurement of molten SiO ₂ -Na ₂ O-NaF system	S. Sakurai	• • •	111
38 Effect of amphoteric oxides on volatilization of Cs ₂ O from Cs ₂ O-SiO ₂ based slags	T. Higo	• • •	112
39 Sizes of bubbles dispersed in mould flux	S. Takahashi	• • •	113
The evolution in the research of high temperature physicochemical property 4			
40 Temperature and composition dependences of density of molten Fe-Ni alloys	M. Watanabe	• • •	114
41 Emissivity measurements of high temperature melts combining with an electrostatic levitation furnace	T. Ishikawa	• • •	115
42 Evaluation of engulfment of molten iron by molten slag/flux for preparation of their core-shell droplet	H. Goto	• • •	116
43 Attempt of calculation of activity coefficient at infinite dilution in metallic solutions from surface tension in binary liquid alloys	M. Nakamoto	• • •	117
Solidification and structure control			
44 (Sawamura Award) Influence of unstable non-equilibrium liquid iron oxide on clustering of alumina particles in steel	T. Mizoguchi	• • •	118
45 (ISIJ Research Promotion Grant • Tawara Award) Evaluation of permeability for columnar dendritic structures by three dimensional numerical flow analysis	Y. Natsume	• • •	119
46 (ISIJ Research Promotion Grant) Dendrite competitive growth simulations of binary polycrystalline alloy by phase-field method	T. Takaki	• • •	120
Property of cast metals			
47 (Nishiyama Commemorative Prize) Improvement of steel quality by controlling dispersion of oxide inclusions	T. Sawai	• • •	121
48 (Nishiyama Commemorative Prize) Fluid dynamic simulation in steelmaking process	Y. Miki	• • •	122
49 Investigation of hot tear using characterization of lamellar eutectic structure	Y. Yoshida	• • •	123
50 Derivation of criterion for surface crack of steel in continuous casting	A. Matsumoto	• • •	124
Recent development of solidification science using in-situ observation 1			
51 Effect of free surface on the solidified structure in horizontal centrifugal casting process	H. Esaka	• • •	125
52 Shear band formation of the mushy region in a model considering the centrifugal casting process	T. Ito	• • •	126
53 Three-dimensional analysis of shrinkage porosity and its influence on the mechanical property	H. Miyahara	• • •	127
Recent development of solidification science using in-situ observation 2			
54 Mechanism of equalization of primary dendrite arm spacing in unidirectional solidification	H. Esaka	• • •	128
55 In-situ measurement of solute partition for Fe-Cr-Ni alloys using X-ray imaging and EDS analysis	I. Uwabe	• • •	129
56 Influence of carbon content on moving velocity of d/g interface in the massive-like transformation	T. Nishimura	• • •	130
57 In-situ observation of deformation in semi-solid carbon steels and measurement of stress during deformation	T. Nagira	• • •	131
Novel processing			
58 Observation of non-conductive particle behavior in electrically conductive fluid under oscillating electromagnetic field	A. Maruyama	• • •	132
59 Motion in liquid-solid two phase induced by ultrasound	Y. Yamakado	• • •	133
60 Influence of electrolyte flow on the structure of anodized Ti-Al microchannel wall	Y. Matsuoka	• • •	134
Hot metal treatment 1			
61 (Nishiyama Commemorative Prize) Development of new steelmaking and continuous casting technology for high quality steel products	J. Yang	• • •	135
62 (Nishiyama Commemorative Prize) Progress of the continuous dephosphorization and decarburization process using BOF	Y. Ogawa	• • •	136
63 Improvement of MURC process in Yawata works.	T. Nakae	• • •	137

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

Hot metal treatment 2

64 (ISIJ Research Promotion Grant) Effect of quick lime grade on dissolution rate into molten slag	N. Maruoka	• • •	138
65 Activity of P ₂ O ₅ in 2CaO.SiO ₂ -3CaO.P ₂ O ₅ solid solution saturated with CaO at 1823 K and 1873 K	M. Zhong	• • •	139
66 Influence of P ₂ O ₅ on dissolution behavior of lime into molten slag	S. Kakimoto	• • •	140

Converter • Secondary refining • Electric furnace

67 Effect of bath oscillation by jet blowing on behavior of spitting generation	S. Ono	• • •	141
68 Effect of wettability on a particle penetrating and floating behavior	A. Matsuzawa	• • •	142
69 Application of EAF for smelting ferro-alloy to stainless steel making shop in yawata works	N. Kaneko	• • •	143
70 Smelt-reduction experiments of the hot steelmaking slag	T. Harada	• • •	144

Refractory

71 Dependence of MgO dissolution rate on the composition of molten CaO-FeO-SiO ₂ slag	T. Sadamoto	• • •	145
72 Investigation of thermal spalling behaviour for refractories from the viewpoint of fracture mechanics	Y. Hino	• • •	146
73 Improvement of wall castable for steel ladle	A. Ishikawa	• • •	147
74 Approach of Muroran converter lifetime prolongation	S. Masato	• • •	148

Reactions in sintering process

75 (Sawamura Award) Continuous cooling transformation (CCT) concept for iron ore sintering using in situ quick X-ray diffraction and confocal laser microscope	M. Kimura	• • •	149
76 Effect of melt formation on the oxidation reaction of metallic iron particle in the sintering bed	K. Fujino	• • •	150
77 Utilization of KR slag in the iron ore sintering process	K. Ono	• • •	151
78 Effect of magnetite on calcium ferrite formation in sintering process	H. Ogi	• • •	152

Sintering process

79 Effect of MgO materials on RDI of sinter	S. Hironaka	• • •	153
80 Effect of quicklime on sintering bed permeability	C. Yamamoto	• • •	154
81 Laboratory study of liquid-fuel injection technology into sintering bed	Y. Iwami	• • •	155

Slag treatment

82 Effect of the temperature and oxygen potential on the removal of sulfur from desulfurization slag	Y. Uchida	• • •	156
83 Evaluation of concrete for blast furnace slag coarse aggregate with low water absorption (development of continuous blast furnace slag solidification process for coarse aggregate-3)	Y. Ta	• • •	157
84 The condition of ettringite formation by the reaction of a slag with alkaline aqueous solutions	A. Harashima	• • •	158
85 CO ₂ treatment for suppression of calcium elution from steelmaking slag.	S. Matsui	• • •	159
86 Highly efficient recovery of metallic Fe from steelmaking slag	H. Kubo	• • •	160

Novel reduction process

87 (ISIJ Research Promotion Grant) Production of nano-scale silicon materials through metallothermic reduction of silica and the application to battery device	O. Terakado	• • •	161
88 Electrochemical measurement of CO ₂ decomposition behavior in LiCl-KCl eutectic melt	S. Natsui	• • •	162
89 Dynamic observation of reduction of hematite by silicon nitride	N. Ishikawa	• • •	163

Continuous casting • Solidification

90 Cavity bridge formation behavior between glass cylinders in mercury	K. Sasai	• • •	164
91 Measurement of critical strain for crack formation by compression test	Y. Awajiya	• • •	165
92 Effect of some conditions to cooling ability of mist spray nozzle by laboratory experiment in a continuous casting process	K. Tsutsumi	• • •	166
93 Application practice of annular step submerged entry nozzle in slab caster at Baosteel	J. Zhi	• • •	167
94 Revamping and effects of No.5 continuous caster at Baosteel	X. Jiang	• • •	168

Measurements and analyses of multiphase and moving boundary phenomena 1

95 Observation of single rising bubble changing in volume	T. Kumagai	• • •	169
96 Numerical simulation of solid-gas-liquid multiphase flows on GPU	T. Tagawa	• • •	170
97 The influence of a surfactant being adsorbed on bubble interface upon bubble motion, its surrounding liquid motion and instantaneous mass transfer	J. Huang	• • •	171
98 A practical application of a novel foam measurement technique of a single-tip- optical fiber probe for a cluster of ozonid foam	A. Nihei	• • •	172

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

Measurements and analyses of multiphase and moving boundary phenomena 2

99 Experimental investigation of shape and fluctuation of cavity by a top-blown jet on liquid surface	K. Ueno	. . .	173
100 Novel two-step simulation for the dynamics of a gas jet-induced depression on a water surface	M. Ando	. . .	174
101 Observation of injected bubble through a horizontal nozzle in water. (modelization of multi phase phenomena in steel refinement process -1)	S. Kasahara	. . .	175
102 Numerical simulation of horizontal gas injection into water (modelization of multi phase phenomena in steel refinement process - 2)	O. Nakamura	. . .	176

Transport phenomena

103 Decarburization of Fe-C melts using CO ₂ -CO mixture	X. Hu	. . .	177
104 Reaction mechanism of boron removal from molten silicon by the CaO-SiO ₂ -CaCl ₂ slag treatment	Y. Wang	. . .	178
105 (Nishiyama Commemorative Prize) Application of mathematical analysis technic for continuous casting process	K. Okazawa	. . .	179
106 Metal emulsion behavior in Sn-Na ₂ B ₄ O ₇ system	J. Liu	. . .	180
107 Electrocapillary phenomena and chemical reaction at the ionic soluton/liquid metal interface	Y. Hiyama	. . .	181

Thermodynamics of transition and tramp elements in steel 1

108 Thermodynamics of the Fe-Cu-S ternary system	K. Urata	. . .	182
109 Measurement of interaction parameter between Ti-M in molten steel using double saturation with two titanium oxides	T. Yoshikawa	. . .	183
110 Problems in thermodynamic analyses in a Fe-Cr-Ni-Mo system alloy	H. Todoroki	. . .	184

Thermodynamics of transition and tramp elements in steel 2

111 Thermodynamics of Cu and Sn in molten iron and Ca-Pb alloy	J. Aboshi	. . .	185
112 Distribution ratio of P and N between molten iron and CaO-Al ₂ O ₃	H. Ono	. . .	186
113 Estimation of activity coefficient at infinite dilution in liquid iron solutions using neural network computation	M. Nakamoto	. . .	187

Environmental, Energy and Social Engineering

Lecture No.	Title	Speaker	Page
Plenary Session			
Resource recycling and harmless process of waste-treatment			
114	Low temperature flue gas denitrification by rare earth catalyst without ammonia	Y. Fang	. . . 188
115	Removal of zinc ion in aqueous solution with magnetite	S. Yokoyama	. . . 189
116	Research on the filtration and purification by microporous ceramic composite membrane	J. Chen	. . . 190
117	(ISIJ Research Promotion Grant) Synthesis of allophane from granulated blast furnace slag	T. Hongo	. . . 191
Advanced utilization of by-materials			
118	(Nishiyama Commemorative Prize) Dissipation and effective utilization of phosphorus in steelmaking	E. Yamasue	. . . 192
119	Comprehensive evaluation of the method for seaweed bed restoration using slag-compost fertilizer	M. Yamamoto	. . . 193
120	Preparation of adsorbent for Cesium(I) from steel-making slag	N. Uehara	. . . 194
Cultural heritage			
121	Modification of carbon content in Japanese steel (Wa-tetu) produced by Tataru	K. Nagata	. . . 195
122	Analysis of the material of dabo steel using at the shinagawa daiba ,one of the batteries built in the end of Edo era (middle of 19th century)	K. Mizumoto	. . . 196
123	Process engineering for control of slag and metal components in low temperature refining furnace	Y. Matsui	. . . 197
124	Crystal structure analysis of specimens of Japanese matchlock gun using pulsed neutron imaging	M. Tanaka	. . . 198
125	Metallographic structure evaluation of Japanese sword by Bragg-edge analysis of pulsed neutron imaging	Y. Shiota	. . . 199

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

Instrumentation, Control and System Engineering

Lecture No.	Title	Speaker	Page
Plenary Session			
Instrumentation			
126	Improvement of on-line ultrasonic detection for internal flaws in steel strip using adaptive signal processing	T. Ozeki	200
127	(ISIJ Research Promotion Grant) Non-destructive inspection for plate-like structures using a remote defect imaging system	T. Hayashi	201
128	Development of steel identification system by spark image analysis method	T. Yoshioka	202
129	Anomaly detection of blast furnace condition using tuyere cameras	N. Yamahira	203
Control			
130	(Shiraishi Commemorative Prize) Development of model based control technology in steel production process	Y. Nishida	
131	The precise measurement and control development in rapid solidification process	S. Lee	204
132	Submaterial blending optimization in converters for operation changes	T. Osaka	205
System			
133	Schedule guidance system for slab extraction sequence from furnace in plate rolling process	K. Nakatsuji	206
134	Jamological approach to steel production and logistics	O. Yamaguchi	207
135	Optimal scheduling of crane logistics system using databases	K. Ito	208

Processing for Quality Products

Lecture No.	Title	Speaker	Page
Plenary Session			
Joining			
136	Effect of metallurgical factors on HAZ toughness of 9%Ni steel	A. Narahara	209
137	Acoustic emission measurement during FSW of carbon steel plate	K. Ito	210
138	Coming out mechanism of the shaft from the ceramics sleeve for the shrink fitted ceramics rollers (considered in the coming out by alternating load using a two-dimensional model)	Y. Sano	211
Manufacturing technology of high quality and high functional bar and wire			
139	(ISIJ Research Promotion Grant) Predicting ductile fracture in ferrous materials during tensile tests using an ellipsoidal void model	K. Komori	212
140	Predicting ductile fracture in pure metals during tensile tests using an ellipsoidal void model	K. Komori	213
141	Study of CAE solver based on elementary processes of deformation (development of CAE platform for industrial education -4)	T. Yoshida	214
Rolling			
142	Curving behavior of thin strip with single-drive rolling	W. Baba	215
143	Effect of sheet thickness on transferred surface roughness by textured roll	R. Ifuku	216
144	Influence of mandrel rolling condition on load for mandrel bar	S. Sasaki	217
145	Establishment of direct rolling	S. Fuchimoto	218
Tool steel and tribology			
146	Interfacial characteristics of Cu-Ni-Si alloy and modified P21 die steel in diffusion bonding	H. Chinen	219
147	Tool wear mechanism in hobbing (Chip formation and effects on the tool wear by workpiece materials)	Y. Yamamoto	220
148	(ISIJ Research Promotion Grant) Development of ultra-high-speed DLC coating method without softening of low-temperature tempered steel substrate.	K. Hiroyuki	221
149	Influence of elapsed time on sliding properties of hot dip galvanized steel sheets	K. Hoshino	222
Oxidation scale			
150	(ISIJ Young Researcher Award) Phase transformation behavior of oxide scale and its control	H. Tanei	
151	High-temperature flow stress measuring for oxide scale on carbon steel	K. Kanai	223
152	Characteristics of contact heat transfer between die and material in hot working(report 2;influence of surface roughness)	S. Ueoka	224

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

Cooling

153	Mechanism of scale thickness affecting on spray cooling characteristics	H. Fukuda	• • •	225
154	Cooling characteristics of O/W emulsion droplets impinging on hot solid	M. Ashida	• • •	226
155	Cooling rate comparison between quenching oil and water soluble coolant	S. Takada	• • •	227

Microstructure and Properties of Materials

Lecture No.

Plenary Session

Title

Speaker

Page

Heat resisting alloys 1

156	(ISIJ Young Researcher Award) Next-generation high-temperature materials for aircraft engine applications	T. Osada		
157	Phase-field simulation of microstructural change in turbine blades of Ni-based single crystal superalloys	T. Kanzaki	• • •	228
158	Microstructure and tensile properties of in 718 built up by selective laser melting	K. Takehi	• • •	229

Structural steel 1

159	(Nishiyama Commemorative Prize) Development of high-performance microalloyed steel for hot forging.	K. Inoue	• • •	230
160	Microstructure and mechanical properties of 4Mn-0.1C steel	A. Ito	• • •	231
161	(ISIJ Research Promotion Grant) Effects of hot working on microstructural change and retained austenite characteristics of TRIP-aided martensitic steels	T. Hojo	• • •	232

Structural steel 2

162	Effect of Si addition on contact fatigue strength of shot-peened case hardening steels	K. Ando	• • •	233
163	Effect of amount of carbon in steel and processing time on the microstructure of nitride compound layer	T. Umehara	• • •	234
164	Effect of Mn on hardening behavior in nitrocarburized plain carbon steel	M. Yuya	• • •	235

Diffusion

165	(Mishima Medal) Structural control of steels and first-principles calculation of the effects of alloying elements	H. Ohtsuka		
166	(Nishiyama Commemorative Prize) Improvement of formability of high strength steels for auto-bodies through microstructure control	K. Seto	• • •	236
167	Atomic interaction of aluminium with nitrogen in alpha iron	A. Akata	• • •	237
168	Alloying effects on microstructure of Fe-1mass%M binary alloys treated by nitriding and quenching process	H. Kubo	• • •	238

Texture

169	Effects of the formation condition of bainite on mechanical property in a bainitic steel	T. Yoshizawa	• • •	239
170	Measurement of texture in steel sheet with neutron diffraction with compact neutron source	Y. Ikeda	• • •	240
171	Increase of magnetostriction of Fe-Ga polycrystalline alloy by texture control using high temperature deformation	Y. Onuki	• • •	241
172	Reliability of rapid bulk texture measurement using iMATERIA Time-Of-Flight neutron diffractometer	P. Xu	• • •	242

Strip steels

173	Effects on stability of retained austenite on stress-strain curve of 0.2C-2Si-5Mn(%)steel	H. Natsumeda	• • •	243
174	Effects of Mn content and isothermal transformation process on impact toughness of TRIP-aided annealed martensitic steels	H. Tanino	• • •	244
175	Difference between effect of carbon and nitrogen on age hardening behavior in ferritic steel	S. Araki	• • •	245

Heat resisting steel 1

176	(Asada Medal) Creep damage and fracture in heat resisting steel welds	M. Tabuchi		
177	Change in hydrogen thermal desorption characteristics of Gr.122 welded joint due to creep	H. Yamashita	• • •	246
178	Creep deformation behavior and microstructural evolution under creep deformation in 10%Cr steel for turbine rotors	M. Mikami	• • •	247
179	Calculation of mobile dislocation density in 9Cr-1W steel	M. Tamura	• • •	248

Heat resisting steel 2

180	Microstructure changes during high temperature deformation of ferritic heat-resistant steel T91	R. Ishii	• • •	249
181	Phase field simulation of dislocation motion focusing on recovery of lath martensite	S. Furukawa	• • •	250
182	Phase field simulation of the lath martensite phase taking into account tetragonal elastic modulus	K. Yoshida	• • •	251

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

Heat resisting alloy 2

183 (Nishiyama Commemorative Prize) Mass effect on Ni-Fe base superalloy for 10-ton class A-USC turbine rotor	T. Takahashi	• • •	252
184 Effect of cooling rate on high temperature ductility of alloy 617	K. Takasawa	• • •	253
185 Creep-fatigue assessment of Alloy617 pipe with SEM/EBSD technique	Y. Tanaka	• • •	254
186 Change in both dislocation density and the character in Alloy 617 after high-temperature fatigue	R. Naito	• • •	255
187 Weldability of SUS316H pipe and creep rupture strength of weld joint	K. Yamada	• • •	256

Heat resisting alloy 3

188 3D observation of grain boundary nucleation of Fe ₂ Nb laves phase in novel Fe-Cr-Ni-Nb austenitic heat resistant steel by FIB-SEM	F. Gao	• • •	257
189 Effect of intergranular precipitates on creep deformation in polycrystalline nickel-based heat-resistant alloy	T. Ito	• • •	258
190 Creep behavior of cold worked Alloy263	N. Kanno	• • •	259
191 Creep strength and microstructure of HR6W welded joint	K. Nomura	• • •	260
192 Effect of grain size on creep properties of model Ni-20Cr alloy	T. Hamaguchi	• • •	261

Strength, deformation behavior 1

193 (Scientific Achievement Merit Prize) Martensite and hydrogen embrittlement in steels	K. Tsuzaki		
194 (Mishima Medal) Developments of high performance steel plates by thermo-mechanical controlled processing and evaluations of their properties	S. Endo		
195 Characteristics of the dislocations in as-quenched ultra-low carbon martensitic steel and its change with cold working	D. Akama	• • •	262
196 (Sawamura Award) Factors affecting static strain aging under stress at room temperature in a Fe-Mn-C twinning-induced plasticity steel	M. Koyama	• • •	263

Strength, deformation behavior 2

197 (ISIJ Young Researcher Award) Quantitative analysis of mechanical characteristic and their origin mechanism in steels by using neutron diffraction	S. Morooka		
198 Dislocation structure of martensitic steel during deformation by neutron diffraction	S. Harjo	• • •	264
199 (ISIJ Young Researcher Award) Change on dislocation density of severe plastic deformed	Y. Miyajima		
200 Effect of coherent strain field on Orowan stress	H. Kaido	• • •	265

Strength, deformation behavior 3

201 (Scientific Achievement Merit Prize) Architected steel achieving strength, ductility and toughness	T. Koseki		
202 Effect of ferrite grain size on the dislocation density of cold-rolled iron	Y. Tanaka	• • •	266
203 Effect of ferrite grain size on the yield point elongation in iron	S. Takaki	• • •	267
204 (Nishiyama Commemorative Prize) Geometrical design enabling enhanced strength-ductility balance	J. Inoue	• • •	268

Strength, deformation behavior 4

205 Analysis of crystal texture variation of IF steels in biaxial tensile state (influence factors on anisotropic work hardening of IF steels-1)	M. Kubo	• • •	269
206 Crystal plasticity analysis of anisotropic work hardening behavior in IF steel(influence factors on anisotropic work hardening of IF steels-2)	Y. Tsunemi	• • •	270
207 Effect of grain size on mechanical properties in dual-phase steel	M. Park	• • •	271
208 (ISIJ Research Promotion Grant • Tawara Award) 3D-simulation of ductile damage evolution in multi-phase steel with heterogeneous microstructures	M. Ohata	• • •	272

Strength, deformation behavior 5

209 Tensile behavior and strain partitioning in DP steels with nano-precipitation in ferrite	N. Kamikawa	• • •	273
210 Analysis of microscopic deformation behavior in local deformation region of dual-phase steel	K. Yasuda	• • •	274
211 3D/4d analysis of void nucleation behavior in Dual Phase steel	T. Saeki	• • •	275

Stainless steels 1

212 (Nishiyama Commemorative Prize) Developmet of high performance stainless steels	Y. Kato	• • •	276
213 Effect of low-temperature carburizing treatment on improvement of pitting corrosion resistance at MnS inclusion in stainless steel	A. Chiba	• • •	277
214 Effect of aging under atmospheric condition on microelectrochemistry of MnS inclusion in stainless steel	A. Chiba	• • •	278
215 Waste ash corrosion resistance of nitrogen added SUS310S type stainless steels	K. Furuya	• • •	279

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

Stainless steels 2

216 (Nishiyama Commemorative Prize) Effect of delta-ferrite on hot workability of austenitic stainless steels	M. Abe	• • •	280
217 Effect of hot prestressing conditions on torsional relaxation of SUS304 wire after cold drawing	S. Yamasaki	• • •	281
218 Three-dimensional characterizations of NbC precipitates at a grain boundary in SUS347	K. Kaneko	• • •	282

Hydrogen embrittlement 1

219 Effect of hydrogen on deformation resistance in pure iron	Y. Matsumoto	• • •	283
220 Effect of hydrogen on deformation behavior in tempered martensitic steel - 2	A. Imai	• • •	284
221 Determination of hydrogen-induced fracture factor of tempered martensitic steel	T. Kambe	• • •	285
222 Hydrogen-enhanced lattice defects of a tempered martensitic steel	K. Saito	• • •	286

Hydrogen embrittlement 2

223 Hydrogen embrittlement susceptibility and induced lattice defects associated with hydrogen and strain of cold-drawn pearlitic steel	R. Konno	• • •	287
224 Change in microstructures and hydrogen embrittlement susceptibility of high carbon chromium bearing steel SUJ2	T. Nagase	• • •	288
225 Hydrogen states and hydrogen embrittlement susceptibility of X80 pipeline steel	M. Hattori	• • •	289
226 Hydrogen trap at semi-coherent interface between bcc-Fe and TiC	H. Sawada	• • •	290

Hydrogen embrittlement 3

227 Microstructural characterization of hydrogen-related cracks in high-Mn TWIP steel	Y. Bai	• • •	291
228 Influence of hydrogen on local hardness of work-harden pure Fe investigated by slow strain-rate electrochemical nanoindentation	K. Tomatsu	• • •	292
229 Elucidating a mechanism of hydrogen-entry resistance of Al-based hydrogen-barrier coating in high-pressure gaseous hydrogen	J. Yamabe	• • •	293
230 Hydrogen diffusion property of low-alloy steels determined with high-pressure gaseous hydrogen	T. Awane	• • •	294

Hydrogen embrittlement 4

231 Hydrogen embrittlement of austenitic stainless steels containing additive elements	H. Itoga	• • •	295
232 Initiation and growth of surface cracks in SSRT test of low alloy steel JIS-SCM435 in high-pressure hydrogen gas	H. Matsunaga	• • •	296
233 Fatigue properties of austenitic stainless steels exposed to high pressure gaseous hydrogen	M. Yoshikawa	• • •	297
234 Fatigue crack growth properties of high tensile strength austenitic stainless steel HP160	Y. Kuwano	• • •	298

Hydrogen embrittlement 5

235 Development of high Mn nonmagnetic steel for high pressure hydrogen equipment.	S. Sato	• • •	299
236 Effects of temperature and hydrogen charge content on tensile property of SUS316L	K. Matsumoto	• • •	300
237 Effect of hydrogen on fatigue-crack growth behavior of types 316L and 304 austenitic stainless steels	A. Nagao	• • •	301

Deformation microstructure

238 Hetero-nano structure and strength of stainless steels fabricated by heavy cold rolling	H. Miura	• • •	302
239 (ISIJ Research Promotion Grant) Tribological behavior under lubricant in nanostructured pure iron produced by severe plastic deformation	Y. Todaka	• • •	303
240 Grain refinement by cyclic displacive forward/reverse transformations in Fe-high Ni alloys	T. Chiba	• • •	304
241 High-temperature deformation behavior of a carbon steel and austenite stainless steel	K. Kasuya	• • •	305

Precipitation

242 Time evolution of precipitation fraction of Ti and Ti-Mo carbide in steel	Y. Tanaka	• • •	306
243 Effect of alloying elements on room temperature aging of ferrite with supersaturated carbon	Y. Kobayashi	• • •	307
244 Formation of GP-zone and laves phase during aging in a 18Cr-0.87Nb ferritic stainless steel	Y. Momota	• • •	308
245 Dominating factors on the dispersion of VC interphase precipitation in v-added steels	Y. Zhang	• • •	309

Microstructure prediction and simulation

246 Relation between the morphology of three-dimensional microstructure and the mechanical properties	T. Kasuya	• • •	310
247 Calculation of fracture toughness based on the iteration method of phase-field microelasticity theory	Y. Horii	• • •	311
248 A first-principles study of electronic structures and phase stability in Fe-Mn-Si alloys	R. Sahara	• • •	312

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

Microstructure formation 1

249	Calculation of partition to no-partition temperature of austenite growth from pearlite in Fe-C base ternary alloys	M. Enomoto	• • •	313
250	Effectivity of chromium in Quenching and Partitioning treatment of martensitic steel	J. Tobata	• • •	314
251	Effects of annealing before cold forging on abnormal grain growth behavior during carburizing	Y. Imanami	• • •	315
252	Development of reversed austenite from fully pearlitic microstructures	S. Morito	• • •	316

Microstructure formation 2

253	Effect of B and Ti addition on growth of recrystallized grain of ultra-low carbon cold-rolled steel sheets	J. Haga	• • •	317
254	Observation of co-segregation of B and Ti at the interface between recrystallized and unrecrystallized grains in ultra-low carbon cold-rolled steel sheets	J. Takahashi	• • •	318
255	Interaction between B and Ti at the grain boundary in bcc iron	H. Sawada	• • •	319
256	Morphology change of ferrite by V and Ti additions effect of V on ferrite formation in steel-1	H. Ito	• • •	320

B-doped weathering steels

257	Impact toughness of welded interface of B doped Al-Si weathering steels	T. Nakamura	• • •	321
258	Effects of B on microstructure formation in welded interface of B doped Al-Si weathering steels	S. Kobayashi	• • •	322
259	Microanalysis technology of B toward actualization of B doped Al-Si weathering steels	S. Meguro	• • •	323

Fatigue

260	(Nishiyama Commemorative Prize) Effect of hydrogen on gigacycle fatigue properties of low alloy steels	H. Hirukawa	• • •	324
261	Influence of Ni addition on fatigue behavior of steels	H. Shuto	• • •	325
262	Effects of corrosion fatigue crack on fatigue life of steel sheet	I. Tokuda	• • •	326
263	Positron annihilation study of lattice defects during the fatigue process of SUS316 steel	K. Sugita	• • •	327
264	(ISIJ Research Promotion Grant) Damage evaluation under creep-fatigue interactive condition based on EBSD method	R. Sugiura	• • •	328

Strength, deformation behavior 6

265	(Tawara Award) Development of numerical model to predict cleavage fracture toughness of ferrite steel	K. Shibamura	• • •	329
266	Effect of roundness on paneling pressure of welded can for beverage	M. Tada	• • •	330
267	Development of interatomic potential used for molecular dynamics calculation of Fe-N binary system material	M. Yamaguchi	• • •	331

Diffusional and diffusionless transformation 1

268	(Sawamura Award) Effect of grain size on thermal and mechanical stability of austenite in metastable austenitic stainless steel	Y. Matsuoka	• • •	332
269	Martensitic reversion in Fe-29%Ni austenitic alloy	S. Kawasaki	• • •	333
270	Variant grouping and pairing in ferrous martensite and bainite structure	G. Miyamoto	• • •	334
271	Effects of MnS and VC on the bainite structure in low carbon steels	Y. Nagami	• • •	335
272	Influence of heating temperature on acicular ferrite formation in simulated heat affected zones of low carbon steel	H. Nako	• • •	336

Diffusional and diffusionless transformation 2

273	Possibility of positive utilization of hcp-martensite in a Fe-Mn-C steel -Deformation-induced reverse transformation from HCP to FCC-	M. Koyama	• • •	337
274	Phase stability of retained austenite in TRIP steels under low temperature tensile deformation	T. Yamashita	• • •	338
275	Prediction of continuous cooling transformation and microstructure formed in Fe-N binary alloys produced by high temperature nitriding	T. Tsuchiyama	• • •	339
276	Effects of Mo content and quenching temperature on hardenability of Mo-B steel	K. Ishikawa	• • •	340
277	In-situ neutron diffraction analysis of dynamic ferrite transformation behavior	A. Shibata	• • •	341

Hot-dip coating

278	Effect of galvannealing temperature on powdering of gamma single phase coating layer	T. Nakamura	• • •	342
279	(ISIJ Research Promotion Grant) Effect of Cr particle impact in AIH-FPP treatment on the transfer phenomena	K. Murai	• • •	343
280	Simulation analysis on the profiles of droplets wetting on the cylindrical substrates	Y. Wu	• • •	344
281	Simulation analysis on the profiles of Sn-3.5Ag wetting on the inclined Cu substrates	L. Zhang	• • •	345

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

Painting/coating & lining

282 (Satomi Prize) Improvement of performances and productivity of pre-painted steel sheets	H. Kanai		
283 (Nishiyama Commemorative Prize) Development of galvanized steel sheet of environmental friendly and high corrosion resistance	A. Takahashi	• • •	346
284 Mechanism of corrosion resistance after hot stamping of 22MnB5 steel aluminized with 40/40 c.w. and ZnO coating	S. Fujita	• • •	347
285 Effect of composition of coated steel sheet on its emissivity	M. Takahashi	• • •	348

Mechanism of corrosion and corrosion protection

286 (Nishiyama Commemorative Prize) Investigation of corrosion behavior of steels with micro-electrochemical techniques	M. Sakairi	• • •	349
287 Initiation and propagation behavior of SCC on sensitized 304 stainless steel in atmospheric environments	K. Nakao	• • •	350
288 Effect of breakdown of passive film by chloride on resistance of rust staining of stainless steels	H. Fuji	• • •	351

Electrical steels 1

289 Effects of silicon contents and texture on hysteresis loss in non-oriented electrical steel sheets	S. Kano	• • •	352
290 Texture change during grain growth of thin primary recrystallized sheet of 3%Si-Fe	T. Imamura	• • •	353
291 Effect of secondary recrystallization temperature on magnetic properties of grain oriented electrical steel	C. Hou	• • •	354

Electrical steels 2

292 Effect of shear deformation in hot strip on texture in 3% silicon steel.	T. Ichie	• • •	355
293 (ISIJ Research Promotion Grant) Effect of Al content on the fracture behavior and DC magnetic property in Fe-Si-Al alloy	T. Mizuguchi	• • •	356
294 Determination of easy and hard axis of Fe ₃ C by rotating magnetic field	T. Terai	• • •	357

Steel plate and pipe

295 Structure analysis of corrosion products on line pipes under mildly sour conditions	K. Baba	• • •	358
296 Effect of carbides size on the ductile fracture in quenched steels	M. Yoshimura	• • •	359
297 (Mishima Medal) To concern product development of welded structure steel for low temperature service	N. Saitoh		

Process Evaluation and Material Characterization

Lecture No.

Plenary Session

Surface & state analysis

298 (Shiraishi Commemorative Prize) Chemical state analysis: development and application to steel and related materials	M. Nagoshi		
299 (Tawara Award) A new approach to quantification of free MgO in steelmaking slag by using solid-state ²⁵ Mg NMR spectroscopy	K. Kanehashi	• • •	360
300 Quantitative trace carbon analysis in steels corresponding to its microstructure	Y. Tanaka	• • •	361
301 Visualization of hydrogen isotope distribution of high strength steel with SIMS.	S. Yabu	• • •	362

Precipitate & inclusion analysis

302 (Scientific Achievement Merit Prize) Fundamental study on refining metallurgy of steel	R. Inoue		
303 (Shiraishi Commemorative Prize) Advanced characterization techniques in iron and steel - X-ray diffraction method and chemical analysis of precipitates and inclusions -	T. Takayama		
304 SEM-EDS of inclusions in metals using glow discharge sputtering	K. Tsuji	• • •	363
305 Estimation of maximum inclusion size by Extreme value statistical analysis	Y. Tsuzuki	• • •	364

Elemental analysis

306 (ISIJ Young Researcher Award) Laser-induced breakdown spectroscopy for the application of sorting of steel scrap	S. Kashiwakura		
307 (ISIJ Research Promotion Grant) Trace elements analysis in steel by liquid electrode plasma atomic emission spectrometry after solid extraction using a mini-column pretreatment system (Auto-Pret system)	A. Hokura	• • •	365
308 (ISIJ Research Promotion Grant) Measurement of weak absorption transition of excited atomic oxygen at 844.6 nm by diode laser coherent forward scattering spectrometry in Faraday configuration	H. Matsuta	• • •	366

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

309	Elemental depth imaging of painted layer on the steel sheet by confocal micro X-ray fluorescence method	R. Yagi	· · ·	367
310	(ISIJ Research Promotion Grant) Portable X-ray fluorescence analyzer utilizing Cartesian geometry	S. Imashuku	· · ·	368
Organic compound analysis				
311	Analysis of structural change of pet film for laminated steel	J. Kitagawa	· · ·	369
312	(ISIJ Research Promotion Grant) Direct condensation aroylation of naphthalene derivative with naphthoic acid and the structures of the produced ketones	A. Okamoto	· · ·	370
313	Some anti-fouling silane compound composite films on iron and their corrosion characteristics revealed by Raman spectroscopy and FTIR-ATR spectroscopy	K. Sano	· · ·	371

Program of the 169th ISIJ Meeting (Mar. 18-20, 2015)

ISIJ and JIM Joint Session

Lecture No.	Title	Speaker	Page
Plenary Session			
Titanium and titanium alloys 1			
J1	Prediction of microstructural evolution in hot forging of titanium-6 aluminum-4 vanadium alloy in (alpha+beta) region	H. Matsumoto	• • • 372
J2	Shape memory properties of superplastic Ti-4.5Al-3V-2Fe-2Mo alloy	H. Tobe	• • • 373
J3	Microstructures and mechanical properties in solution-treated and aged Ti-6Al-7Nb alloy processed by high-pressure torsion	M. Hanai	• • • 374
J4	Influence of initial microstructure on mechanical properties of Ti-6Al-7Nb alloy processed by high-pressure torsion	M. Ashida	• • • 375
J5	Microstructure and mechanical properties of severely deformed Ti alloys	A. Jastrzebska	• • • 376
Titanium and titanium alloys 2			
J6	Improvement of strength-ductility balance of Mo added beta-type Ti-Mn alloys through controlling deformation-mechanism	K. Cho	• • • 377
J7	Changes in crystal structure and material property by deformation in quenched martensite of Ti-Nb alloys	Y. Mantani	• • • 378
J8	Strengthening beta Ti-Mo alloys through pre-strain induced twins and subsequent ageing	X. Min	• • • 379
J9	Effect of elemental segregation on deformation behaviors in Ti-Mo alloys	X. Ji	• • • 380
Titanium and titanium alloys 3			
J10	Effect of heat treatment on microstructure and mechanical properties of CP Ti produced by electron beam melting	W. Saito	• • • 381
