Program of the 175th ISIJ Meeting

Campus map

- A Building No.1: Ceremony of conferment of the honorary membership and prize awarding, Special lecture meeting(1st Fl.)
- B Building No.5: ISIJ Reception Desk & Secretariat, Session Room 1 (1st Fl.), Session Room 2–3 (2nd Fl.), Session Room 4 (3rd Fl.)
- © Building No.7: Session Room 7, 13–17 (2nd Fl.)
- D Building No.8: Session Room 5, 6 (1st Fl.), Session Room 8–12(2nd Fl.)
- © Canteen Building: Cafeteria(1st Fl.), Banquet, ISIJ Beer Party(2nd Fl.), Poster Session for Students(3rd Fl.)
- Shop

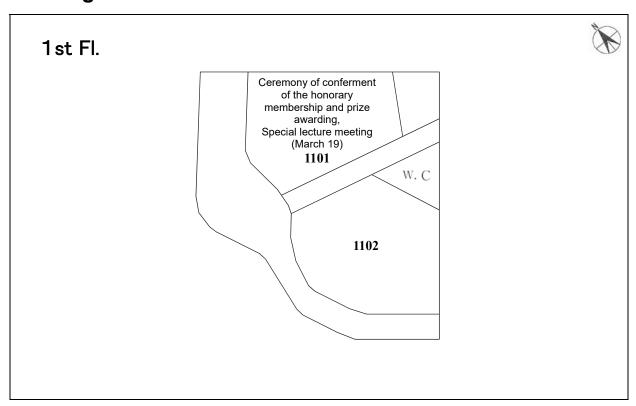

Banquet

1. Date: March 19, 2018 18:00~20:00

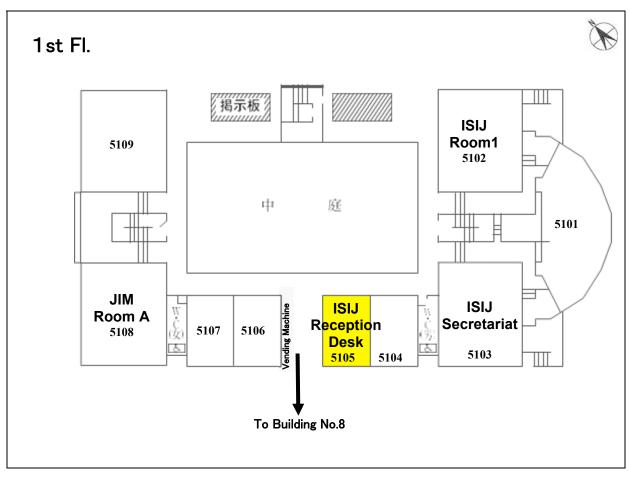

2. Vanue: Canteen Building, Shin-Narashino Campus (2nd Fl.)

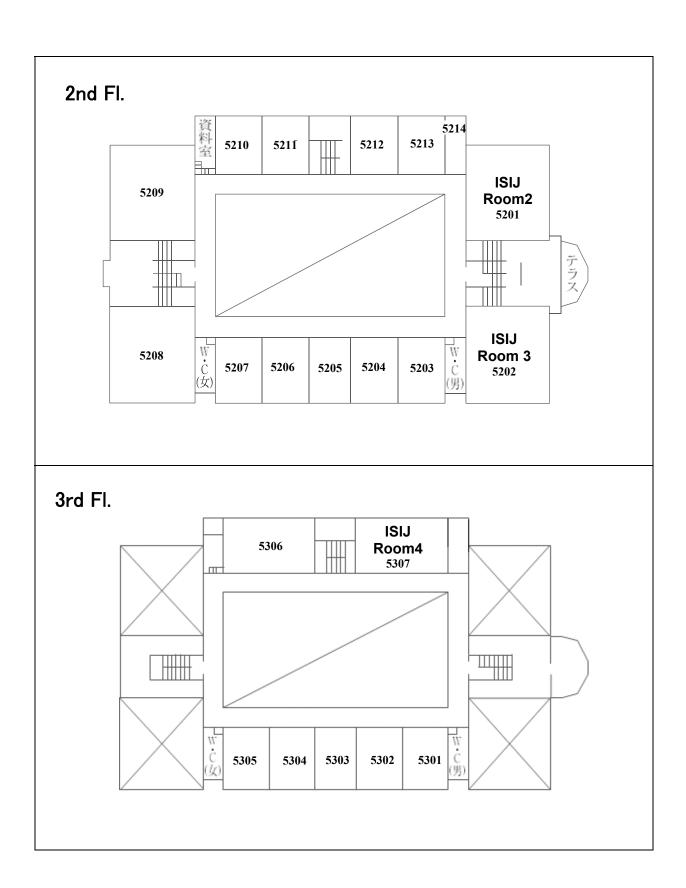

3. Fee: 7,000yen

Building No.1

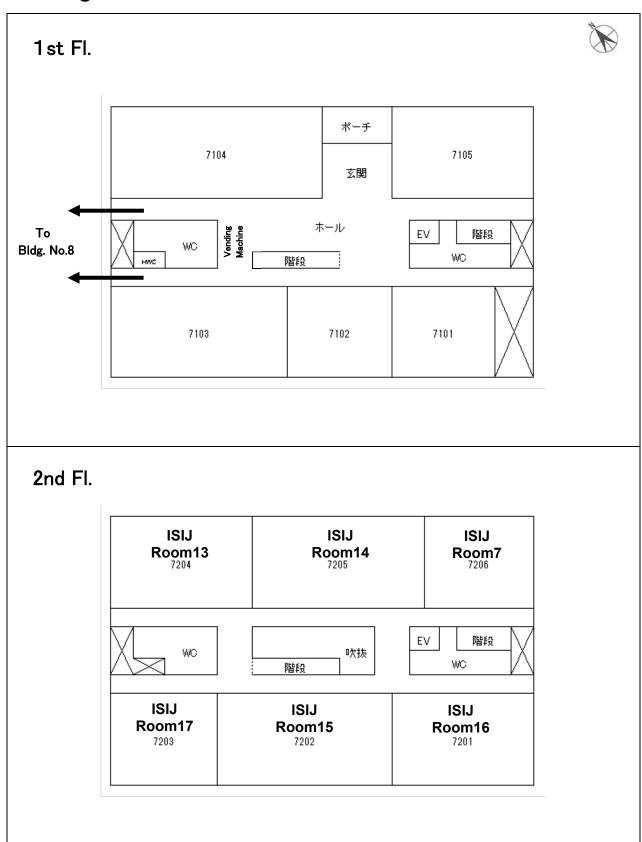

Building No.5

Building No.8

$\label{thm:continuous} The timetable the 175th ISIJ Meeting \\ (March 19-21, 2018 at Chiba Institute of Technology, Shin-Narashino Campus)$

| Caratan Dana | Mar. 19 | (Mon.) | Mar. 20 | (Tue.) | Mar. 21 | (Wed.) |
|--|---|--|--|---|--|---|
| Session Room | AM | PM | AM | PM | AM | PM |
| Session Room 1 No.5 Bldg. Room 5102 | Refractories [1-5] (10:00-11:40) | | Transport phenomena 1 • 2 [23-29] (9:00-11:30) | Cutting-edge approaches by multidiscipline fields for comprehension of high temperature phenomena and materials design Vol.2 1-2-3 [30-41] (13:00-17:20) | Continuous casting and solidification [73–77] (9:30–11:10) | |
| Session Room 2 No.5 Bldg. Room 5201 | Thermodynamics 1 • 2 [6-14] (9:00-12:10) | en en 100 | Agglomeration processes/Young engineer session of iron making [42–49] (9:10–12:00) | Softening and melting behavior/ Fluid flow in lower zone/ Reduction of iron oxide | Operational improvement and theoretical consideration in refining process 1 • 2 | process 3 |
| Session Room 3 No.5 Bldg. Room 5202 | Young engineer session of coke-making 1 • 2 [15-22] (9:00-11:50) | | | | [78-85] (9:00-11:50) Electromagnetic processing of materials/Novel processing [89-96] (9:00-11:50) | [86-88] (13:00-14:00) Coke making [97-101] (13:00-14:40) |
| Session Room 4 No.5 Bldg. Room 5307 | | | Approach of steelmaking to | o mitigating climate change 0:30-15:45) | | |
| Session Room 5 No.8 Bldg. Room 8108 | Eco-technology for iron and steelmaking system with energy and material recycling II 1·2 [102-109] (9:00-11:50) | | Solidification and structure control 1 • 2 [59-64] (9:30-11:40) | Elucidation of dynamics in solid- liquid coexisting zone and formation mechanism of cast defects (13:00-16:25)[Charge-free] | Production and utilization of clean raw materials and fuels and/or clean energy [125-127] (10:30-11:30) | |
| Session Room 6 No.8 Bldg. Room 8109 | Analysis and assessment on social value of steel 1 • 2 [110-115] (10:00-12:10) | | Slag and dust treatment 1•2 [65-72] (9:00-11:50) | Energy and environment 1·2/ Cultural heritage [116-124] (13:00-16:20) | SMART research group final rep ironmaking system with car [D10-D20] (| bon and materials recycling |
| Session Room 7 No.7 Bldg. Room 7206 | | | Instrumentation 1 [128–131] (10:00–11:20) | Instrumentation 2/ Control and system [132-139] (13:10-16:00) | | |
| Session Room 8 No.8 Bldg. Room 8208 | | | Manufacturing technology of high quality and high functional bar and wire/Tribology [140-147] (9:00-11:50) | Advances in material modeling for the forming simulations of steel sheets [D21–D29] (13:00–17:00) | Cooling/Rolling [148-154] (9:20-11:50) | Current research and development in cold rolling [D30-D35] (13:00-16:15) |
| Session Room 9 No.8 Bldg. Room 8209 | Structure analysis of martensite [155-159] (10:20-12:00) | | Modeling and simulation/ Aging and precipitation [169–176] (9:00–11:50) | Microstructure formation 1 • 2 [177–184] (13:40–16:30) | Microstructure formation 3 [251-255] (9:30-11:10) | |
| Session Room 10 No.8 Bldg. Room 8210 | Fabricability [160–163] (9:00–10:20) | | Strength and deformation behavior 1 • 2 [185-191] (9:20-11:50) | Strength and deformation behavior 3 · 4 [192-198] (13:00-15:30) | Machine structural steel 1 • 2 [256-262] (9:00-11:30) | Machine structural steel 3/ Machinability [263-266] (13:00-14:20) |
| Session Room 11 No.8 Bldg. Room 8202 | Fatigue property [164-168] (10:00-11:40) | | Stainless steels 1 • 2 [199-205] (9:30-12:00) | Heat resistant steels/ Heat resistant alloys [206-212] (14:00-16:30) | Electrical steels and magnetic materials 1 • 2 [267–274] (9:10–12:00) | |
| Session Room 12 No.8 Bldg. Room 8201 | | | Hydrogen embrittlement 1 • 2 [213–219] (9:20–11:50) | Hydrogen embrittlement 3·4·5 [220-230] (13:00-17:00) | Hydrogen embrittlement 6•7 [275-280] (9:30-11:40) | |
| Session Room 13 No.7 Bldg. Room 7204 | | | ISIJ and JIM joint session Titanium and its alloys 1·2 [J1-J6] (9:40-11:50) | ISIJ and JIM joint session Titanium and its alloys 3•4•5 [J7-J17] (13:00-17:00) | ISIJ and JIM joint session Titanium and its alloys 6·7 [J18-J24](9:20-11:50) | Ti∙Ti alloy [281–283] (13:00–14:00) |
| Session Room 14 No.7 Bldg. Room 7205 | Dislocation characterization and properties in stainless steel (9:00-11:50)[Charge-free] | Toward understanding of corrosion– Induced hydrogen absorption to steels in air – Part 1 (13:30–17:00)[Charge-free] | Surface technology and chemical property [231-235] (10:20-12:00) | Hot-dip coating/Mechanism of corrosion and corrosion protection [236-243] (13:00-15:50) | | Present conditions and maintenance for aging infrastructure III (13:00-16:30)[Charge-free] |
| Session Room 15 No.7 Bldg. Room 7202 | Cutting edge of st (9:00–17:00)[| | Cutting edge of steel informatics - 2 (9:00-11:30)[Charge-free] | Brittle and ductile fracture 1 • 2 [244-250] (14:00-16:30) | Deepening of understanding of brittle crack propagation behavior of steels and new approach for high arrestability (9:00–12:30)[Charge-free] | |
| Session Room 16 No.7 Bldg. Room 7201 | New views of microstructural mech materials based on X-ra (10:00-16:55) | ay and neutron analysis | Phase interface science to elucid microorg (10:00-16:30) | | Light elements in steels - New insig | |
| Session Room 17 No.7 Bldg. Room 7203 | | Characterization of free-MgO in steelmaking slag (13:00-17:00)[Charge-free] | Elemental analysis 1 [284-288] (10:00-11:40) | | Elemental analysis 2/ Structural analysis [289-294] (9:30-11:40) | |
| JIM-Session Room A No.5 Bldg. Room 5108 | | | ISIJ and JIM joint session Ultrafine grained materials -fundamental aspects for ultrafine grained structures- [J25-28] (10:25-11:45) | | | |
| | *Ceremony of conferment of the awarding, Special lecture meeting Room 1101) *Banquet (18:00–20:00 at Cafet | | *Poster Session for Students (1 *ISIJ Beer Party (17:30-19:00 a | | | |

| []: Lecture Number | | * Board Meeting: | |
|--|---|---|--|
| (): Lecture Time | ш | Instrumentation, Control and System Engineering | March 20 (Tue.) 12:00-13:00 Session Room 7 |
| : Symposium: Please ask to each of symposium room desks directly | | Processing for Quality Products | March 21 (Wed.) 12:00-13:00 Session Room 8 |

High Temperature Processes

| Lecture No. Discussion Sessions Title | Speaker | Pa | age |
|--|--|-----------|--|
| Research and development of technique elements aiming for new-cokemaking process | | | |
| 9:40-10:15 D1 Reforming of low lank coal by chemical upgrading | T. Takanohashi | | 1 |
| 10:15-10:50 D2 Production of cokes utilizing brown coals depolymerized by wet oxidation | R. Ashida | | 3 |
| 10:50-11:25D3 Preparation of coke from non-/slightly-caking coal by a sequence of pulverization, briquetting and carbonization | J. Hayashi | | 5 |
| 12:30-13:05 D4 Production of high strength cokes from low quality coals chemically-modified with thermoplastic components | N. Tsubouchi | | 7 |
| 13:05-13:40 D5 Quantitative correlations between chemical structure of char and gas evolution characteristics of coal upon heating | K. Norinaga | | 9 |
| 13:40-14:15 D6 Effect of heating pattern on coke strength of solvent upgraded low rank coals | A. Sharma | | 11 |
| 14:30-15:05 D7 Evaluation of appropriate heating condition and reforming effect for each coal type | H. Fujimoto | | 13 |
| 15:05-15:40 D8 Impact of heating rate on expansion ratio of coal during heating process by means of theoretical model of bubble nucleation, growth and coalescence | K. Taki | | 15 |
| 15:40-16:15 D9 Evaluation of new briquette in carbonization | Y. Saito | | 17 |
| Environmental, Energy and Social Engineering Lecture No. | | | |

Processing for Quality Products

| Lecture No. Discussion Sessions Title | Speaker | Pa | age |
|---|---------------|----|-----|
| Advances in material modeling for the forming simulations of steel sheets | | | |
| 13:10-14:00 D21 (Invited Lecture) Development of experimental evaluation methods of work-hardening behavior and material modeling for steel sheets | S. Shirakami | | 42 |
| 14:00-14:20 D22 Toward improvement of accuracy of crystal plasticity analysis by using oligocrystal | T. Hama | | 46 |
| 14:20-14:40 D23 (Sawamura Award) Development of biaxial tensile test system for in-situ scanning electron microscope and electron backscatter diffraction analysis | M. Kubo | | 47 |
| 14:40-15:00 D24 Hydraulic bulge forming simulation using a material model based on crystal plasticity simulation | T. Hakoyama | | 51 |
| 15:10-15:30 D25 Verification of yield functions by tensile tests with rotated principal axes | R. Ageba | | 52 |
| 15:30-15:50 D26 (ISIJ Research Promotion Grant) Hole expanding simulation by spline yield function | H. Tsutamori | | 56 |
| 15:50-16:10 D27 The hole expansion forming simulation for a cold rolled steel sheet by material modeling using multiaxial stress tests | H. Nakano | | 60 |
| 16:10-16:30 D28 Hole expansion simulation of high-strength steel sheets | H. Hamasaki | | 61 |
| 16:30-16:50 D29 Measurement of the strength differential effect of DP980 steel sheet and experimental validation using pure bending test | T. Maeda | | 63 |
| Current research and development in cold rolling | | | |
| 13:05-13:35 D30 In situ measurement of contact resistance between rolls and workpiece during cold rolling | H. Utsunomiya | | 64 |
| 13:35-14:05 D31 Fundamental study of lubrication characteristics of high strength steel in cold rolling | M. Shimura | | 68 |
| 14:05-14:35 D32 Simulation of the cross buckling and the longitudinal buckling in cold rolling | K. Komori | | 71 |
| 14:45-15:15 D33 Effect of outlet angle to buckling behavior during thin sheet rolling | T. Okazaki | | 72 |
| 15:15-15:45 D34 Development of curling control mechanism for cold twelve-high rolling mill (KT mill) | T. Miyazono | | 74 |
| 15:45-16:15D35 (Invited Lecture) Precision cold-rolling technology and its application to development of new products | S. Tanaka | | 76 |

International Organized Sessions

High Temperature Processes

Approach of steelmaking to mitigating climate change Session organizer: R. Inoue [Akita Univ.], F. Tsukihashi [The Univ. of Tokyo] 9:30-9:35 Opening Address: F. Tsukihashi [The Univ. of Tokyo] Chair: R. Inoue [Akita Univ.] 9:35-10:05 Int.-1 Experimental research on the dust emission of multiple raw materials in the stockyard of a steel plant Tongji Univ. OH. Li · H. Yang, Baoshan Iron & Steel W. Wei · Y. Zhang 80 10:05-10:35 Int.-2 Recycling of steelmaking slag and dust for sustainable steel production The Univ. of Tokyo OH. Matsuura 84 Int.-3 (Invited Lecture) Approach of heat recovery from BF slag and CO2 absorption by steelmaking slags in China Wuhan Univ. of Science and Technology OG. Li · G. Ma 88 Int.-4 (Invited Lecture) The use of recycled stainless steel slags to replace lime for neutralization of acid baths Royal Institute of Technology OP. Jönsson · M. Colle · A. Gauffin · A. Karasev · G. Renman, . . . 92 Sandvik Materials Technology O. Sundqvist, Outokumpu Stainless AB G. Ruist Chair: F. Tsukihashi [The Univ. of Tokyo] Int.-5 Prevention of alkaline dissolution from steelmaking slag Akita Univ. OR. Inoue · S. Yamashita 95 13:30-14:00 Int.-6 (Invited Lecture) Modernization scenarios for iron and steel industry towards meeting the climate change mitigation target National Metallurgical Academy of Ukraine OV. Shatokha 99 Int.-7 (Invited Lecture) Hydrogen utilization for a clean and sustainable ironmaking future Yonsei Univ. OD. Min · W. Kim · S. Shin 103 14:40-15:10 Int.-8 CO₂ ultimate reduction in steelmaking process (COURSE50 Project) Nippon Steel & Sumitomo Metal OK. Araki 106 15:10-15:40 Int.-9 Near-net-shape casting process and microstructure evolution toward reduction of CO₂ emission and utilization of steel scrap Tokyo Tech OY. Kobayashi 110

Closing Remark: R. Inoue [Akita Univ.]
